

```
>> Welcome to ToDoList
>> You have 2 tasks todo and 0 tasks are done!
>> Pick an option:
>> (1) Show Task List (by date or project)
>> (2) Add New Task
>> (3) Edit Task (update, mark as done, remove)
>> (4) Save and Quit
>>
```

1.

You see a main menu when you can see how many tasks are undone and done.

Now you can choose what you want to do.

If you want to see all tasks by a specific date or project, you must enter number 1 and then you will see this:

1.By date?

2.By project ?

- Now you have to enter 1 if you want to see tasks by date or 2 if you want to see tasks by project ID.
- If you choose 1 so then you will see this:

Write a date DDMMYY:

Here you have to write a date in a specific format DDMMYY.

If tasks exists then they will show up if not the message “tasks not found” will show up.

Then you have to decide if you want to continue or not. If yes you have to enter y or Y or not n or N. If you enter something else so a proper message will pop up.

- If you choose number 2 by project so you will see:

Write project's ID number:

You have to enter it and then do the same like with number 1.

2.

If you choose number 2 in main menu so you will create a new task.

- First enter task ID number. If such number already exists so a proper message will show up.
- Then you have to write task's title for example "buy milk".
- Then write task date (which day you want to do task).
- Then you have to decide if task will be assign to a new project or current. If new so enter n or N if current so enter c or C.
- Write project Id number.
- You have added a task! Do you want to continue? Enter y , Y, n or N.

3.

If you want to edit your task.

- First write task id number. The task must exists otherwise a proper message show up.
- Then you will see a menu where you can choose want you want to do with the task.
- Enter number 1 if you want to change the title then just write a new one.
- Enter 2 if you want to mark task as done.
- Enter 3 if you want to change a date of the task. Then just enter a new date.

- Enter 4 if you want to remove task. Then it just remove it.
- Enter 5 if you want to change task id number. Then just write a new one.
- Enter 6 if you want to go back to main menu.

4.

If you want to save your list, print all tasks and quit program just enter 4.
